Learning for the learning industry from Mark Zuckerberg's Jarvis

By Prashant Khanna

We have broken this article into 4 parts
- ➤ **Past**
- ➤ **Present**
- ➤ **Future**
- ➤ **Relationships**

Past

Speed of technology evolution has been quicker and quicker. This has reduced as time went by from phones to TVs to mobiles. And in each product category the evolution has left one more and more astonished.

Present

Zuckerberg's smart home software solution Jarvis is just another eye opener

For Management
- Evolving and adapting technology is not a option but a survival necessity

For Learning Teams
- As for management, the learning teams are also seeing the challenge around them due to technology up gradation.

Future

The list is huge but some of the enablers in years to come will be

- Robotics
- Smart Homes
- Voice recognition
- Virtual Reality

- Driver-less Cars
- Wear-ability
- Artificial Intelligence

Learning teams will need to
- Train on how to choose and use tools
- Move from knowledge to skills and values
- Encourage a coaching approach
- Adapt training to business
- Be quick to integrate technology into learning and business based goals of the entities they are responsible for

Relationship

Make plans to make to get made these solutions keeping into account the business priorities

Summary

The two mantras for the learning industry from Mark Zuckerberg's Jarvis will be:
1. Technology will take over mundane and not so mundane activities
2. Become integrators of technology in learning.
