# Learning for the learning industry from IT evolution

We have broken this article into 4 parts

- **Past**
- **Present**
- **Future**
- **Relationships**

## ◆ Past

- IT had in the beginning the elementary diode
- The systems were basic and highly encrypted
- It was meant for specialized programmers
- However as time passed the systems were holistic and together

## ◆ Present

- Systems are giving more and more comfort to the user
- However the holistic bodies are breaking up into smaller subparts

## ◆ Future

- The systems will get highly broken and into many specialized sub parts
- Comfort and to a large extent human intervention will be a thing of the past

# Learning for the learning industry from The Evolution of Sales

## Relationship

- The relationships with machines will grow and human touch will need a conscious intervention to harness

## Summary

- Systems will get more and more specialized with a strong need to integrate and give holistic solutions
- Comfort addiction and human replacement will be the trend to watch
- Strong need to make human relationships a intuitive experience to keep the sustainability of man as a social animal will emerge
